

# High -Voltage Training & Methodologies Services

Ampjack Industries Ltd provides electrical utilities and power line contractors with a broad range of T&D training services. Our instructors and procedure/module developers have years of training and field experience in distribution and transmission voltages up to 500 kV AC and 600 kV DC, on both overhead and underground plant. Our team has extensive knowledge in various utility and governing policies and procedures and adheres to them to promote safety in the workplace.

The Ampjack Industries Ltd. Training Group works directly with your utility or contractor management, along with safety and operations personnel to come up with the best product to satisfy you, our client's needs.
